

## Main control touchscreen console

### Key features

- Multisport console allows the management of more than 18 sports.
- 7" multilingual color touchscreen display.
- Intuitive use, with no need of written instructions.
- 14-hour average life rechargeable lithium battery.
- 2.4GHz radio transmission, with FHSS (Frequency Hopping Spread Spectrum) technology to avoid interference caused by other devices.
- USB port to easily update sports rules.
- Impact proof as per EN-60950 for movable equipment.
- Modern and ergonomic design, conceived for desktop and hand-held use.
- Supplied with power supply unit and battery charger.
- Guarantee: 2 years.

### Specifications

- 7" color touchscreen display.
- Ideal for managing many different sports, such as basketball, 3x3 basketball, mini-basket, volleyball, water-polo, handball, netball, rugby, ice hockey, rink hockey, football, futsal FIFA, futsal AMF, tennis, table tennis, badminton, boxing, wrestling and all the sports with the same features of other sports already managed.
- Intuitive use, with no need of written instructions.
- Multilingual. All the texts are displayed in the selected language: Italian, English, French, Spanish and German.
- All game information is displayed at the same time in the main sport screen, included statistics panels with fouls and points of each player.
- Up to 75 teams and relevant players can be entered, memorized and retrieved.
- A color can be associated to each team; all the buttons assigned to a team are displayed with the associated color.

This facilitates the operator and avoids mistakes.

- Wired and wireless communication with the scoreboards.
- Reliable wireless communication: by 2.4GHz FHSS (Frequency Hopping Spread Spectrum) radio transmission to avoid interferences. The use of a wireless system reduces costs by eliminating the need of a cable connection between console and scoreboards.
- Including a rechargeable lithium battery with 14-hour average life and battery charge level indicator. The console can be directly connected to the mains using the 100-240V universal power supply unit supplied with the console. The unit also serves as battery charger.
- Thanks to the battery power supply and the wireless communication requiring no cable connection, free positioning and movement is possible while using the console.
- USB port for easy software update in case of changes to sports rules. The update is automatically carried out by simply inserting the USB key containing the new software.
- Impact proof as per EN-60950 for movable equipment. Sturdy ABS case.
- Modern and ergonomic design, conceived for desktop and hand-held use.
- The shot clock and the chronometer can be managed either directly from the console or through the additional "Time-Console-03" consoles, art.232-03.
- Dimensions and weight. 24.5x17x8.5cm, 1.35kg.
- Guarantee: 2 years. (info)

**Parts included in the supply:**
